PROFILE SUMMARY

Full Stack Engineer with 5+ years of experience building scalable, distributed and data-intensive systems using **Node.js, Java, TypeScript, React and Azure**. Experienced in real-time telemetry, Kafka-based event processing, microservices, cloud infrastructure and high-scale consumer applications, with production experience supporting **10K+ devices** and **1,000+ monitored channels per second**. Passionate about **AI-driven development**, prompt engineering, and integrating generative AI into engineering workflows to improve developer productivity and accelerate feature delivery.

TECHNICAL SKILLS

Backend: Node.js, Java, Spring Boot, Hibernate, Express, REST APIs, WebSockets

Frontend: ReactJS, Angular, Next.js, Redux/Zustand

Distributed Systems: Microservices, Kafka, Event-Driven Architecture, System Design(HLD/LLD)

DevOps/Cloud: Azure, Docker, Kubernetes, CI/CD,Azure DevOps, AKS, Azure Monitor

Databases: SQL(PostgreSQL), NoSQL(MongoDB), InfluxDB, Redis

Languages: JavaScript, TypeScript, Java, Python

AI/LLM: Python, LangChain, RAG, AI Agents, Generative AI, Prompt Engineering, GitHub Copilot, Cursor,

Claude Core: Data Structures and Algorithms, Scalable Architecture, Agile Methodologies, Unit Testing

WORK EXPERIENCE

Software Engineer II

September 2023 – Present

Eaton

Pune, India

- Engineered end-to-end real-time monitoring capabilities for Eaton's **\$30M Brightlayer Software Suite (BLSS)**, supporting **10K+ connected industrial/data-center devices** across frontend, backend and telemetry systems.
- Developed scalable Node.js and Java microservices and REST APIs for telemetry processing and API orchestration, leveraging InfluxDB, PostgreSQL and Redis for time-series, relational and low-latency workloads.
- Architected and tuned Kafka-driven telemetry pipelines processing 1,000+ monitored channels per second, leveraging topics, partitions, consumer groups and batching to improve telemetry throughput and processing efficiency.
- Managed CI/CD pipelines using **Azure DevOps** for automated build, testing, code quality and deployment workflows across microservices and frontend applications.
- Integrated **LLM-powered capabilities and AI agents** into BLSS using **LangChain, RAG and MCP-based tool integration**, enabling models to retrieve relevant telemetry and analytical data, reason over device context, and provide contextual insights for UPS health and anomaly investigation.
- Implemented real-time monitoring using **WebSockets, React and Angular**; enhanced rendering, state management and virtualization, achieving **50% faster visualization** and **40% lower UI load times**.
- Drove adoption of **Generative AI and LLM-powered development workflows** through Eaton's **Dhruva AI** initiative, accelerating AI-assisted feature development and engineering productivity across teams.

Software Engineer – Full Stack

March 2022 – September 2023

Ather Energy

Bengaluru, India

- Built and secured an **EV charging subscription platform** integrating **Stripe and Razorpay** for subscription and transaction workflows supporting **40K monthly subscriptions**.
- Enhanced applications using **React, Node.js, TypeScript and PostgreSQL**, delivering approximately **40% improvement in platform performance** through application and data-layer improvements.
- Architected highly available **AWS infrastructure** using ECS, Application Load Balancers and caching, enabling applications to handle **5× traffic with zero downtime** for a platform serving **40K monthly subscriptions and 1M+ website visitors**.

Associate Software Engineer

August 2021 – March 2022

Accenture

Bengaluru, India

- Developed secure banking modules for the **Fiserv Digital Banking Platform** using **ReactJS, Node.js and PostgreSQL** for customer onboarding, account management and transaction workflows.

LEADERSHIP & MENTORSHIP

- Mentored a **team of 6 engineers** at Eaton, guiding technical decisions, conducting code reviews and establishing engineering best practices.
- Drove organization-wide enablement on **GitHub Copilot, Prompt Engineering and AI-assisted development**, accelerating adoption of GenAI workflows across engineering teams.
- Conducted live coding and mentorship sessions with Coding Ninjas, upskilling **100+ students** in full-stack and software development.

EDUCATION

B.Tech in Computer Science & Engineering

August 2017 – July 2021

G.L. Bajaj Institute of Technology & Management

GPA: 8.8/10
